

Kewill Flagship™

Maintain Control of
your Global Parcel
Shipping Operations

High-volume, Multi-location Parcel Shipping Software

To satisfy the demands of your domestic and international shipments, you need to be confident that no matter where packages are destined, or where they originate, your shipments will be delivered on time, cost efficiently and with minimal interruption.

Kewill's parcel shipping solutions can help you meet these objectives. Used by thousands of companies every day, our solutions automate mission-critical processes for parcel and LTL shipping - enabling superior cost management, cycle time reductions and faster, more reliable deliveries to customers.

Kewill Flagship - a solution for the most demanding shipping operations

Kewill Flagship™ is an enterprise class multi-carrier shipping management system that supports complex, high volume, multiple location, international and domestic shipping. Kewill Flagship was designed from the ground-up to support black box or attended ship stations in complex distribution environments.

Kewill Flagship meets the needs of the most demanding shippers. The demonstrated scalability of this shipping application enables the management of over 2,000 shipping stations from a single deployment – or over 100,000 shipments from a single shipping station. Over 2 million packages are shipped through Kewill software every day.

Benefits of Kewill Flagship

- Maintain control and visibility of shipments as they move throughout your global supply chain
- Ship to international customers more cost effectively and reliably
- Flexibly expand or contract shipping operation with scalable solution
- Improve customer service by identifying and resolving issues before they become a problem
- Enforce corporate shipping policies and rates across multiple locations
- Streamline workflow by integrating shipping solution with existing material handling systems and host applications
- Reduce cost of global supply chain with international origin shipping within one centralized solution
- Minimize risk of international shipments with global trade compliance features

“Given The Swiss Colony’s growth we needed a high performance, highly scalable parcel shipping solution. After evaluating many enterprise solutions it was clear Kewill had the best offering and organization”
Steve Wheeler, Director of Logistics,
Colony Brands, Inc.

500 MILLION

Our solutions handle the largest parcel shipping volume in the US estimated at over 500 million packages every year!

Kewill Flagship Features

Multi-Carrier Compliance

Automate shipping for all carriers. Enjoy the benefits of full carrier compliance, including compliance labeling, reporting, and electronic manifesting for both domestic and international origin carriers.

Rate Shopping

To get the best carrier rates and services, you need to shop around. Kewill Flagship provides you with all the information you need to get the best shipping rate for every package you ship. Shop for the 'best' carrier based on cost, weight, zone, zip code or time in transit.

Complex Rules Engine

Kewill Flagship is designed to work in any organizational configuration and with any business processes through the use of its business rules engine.

- o Facilitates rapid, seamless integration by minimizing changes to processes or host application
- o Select carrier and service automatically based on user defined criteria
- o Drive compliant documentation and perform denied party look ups based on consignee and destination, including printing the correct customs paperwork.

Multiple Locations

Kewill Flagship can be configured to manage multiple locations, warehouses or distribution centers from a single software instance providing ease of management for daily operations and carrier compliance updates.

- o Control costs by leveraging negotiated rates across the enterprise
- o Use customized packaging and pre-configure the solution to correctly rate each parcel based on accurate shipment size

LTL Rating

Kewill Flagship provides shippers with the most comprehensive system to manage compliance for parcel and LTL shipments. The solution offers a simplified process for updating LTL tariff information while the ability to rate shop across parcel and LTL carriers simplifies transportation decisions and reduces costs.

Returns

Kewill Flagship supports multiple returns services allowing shippers cost effective and convenient ways to provide returns services to their customers.

- o Return labels can be generated along with the outgoing label and placed in the shipping carton with merchandise, emailed to the recipient or printed on a packing slip.
- o In addition to standard UPS and FedEx returns services Kewill Flagship supports Newgistics SmartLabel®, UPS Returns® Flexible Access, and FedEx SmartPost®.

Visibility

Kewill Flagship provides enhanced visibility into the supply-chain including international orders that involve multiple legs and transportation modes.

- o Reduce the time you spend tracking shipments
- o Quickly provide your customers with up-to-date shipment information
- o Customers and employees gain shipment visibility in real-time, online or via proactive messaging with customized advance shipment notifications

International Shipping

With support for international origin carriers Kewill Flagship can help you ship anywhere to anywhere in the world. The solution will also manage complex export documentation such as shippers export declaration, commercial invoices, denied party screening and harmonization codes.

- o Ship to international customers more cost effectively and reliably

Packing Module

Kewill Flagship has a packing module that allows users to pick and pack cartons and shipments while verifying the contents against actual order details.

- o Increase fulfillment speed by producing packing slips and carrier labels in one seamless workflow
- o Capture and/or validate lot and serial number information
- o Maintain vendor relations by printing vendor compliant carton content labels
