Multi-Carrier Software  
Full Carrier Compliant  
Scalable Software  
Developer API  
Desktop Shipping  
Global Shipping  
Mobile Shipping  
Virtual Manifesting  
e-Commerce Integration

ABOL Software is a leading global shipping software provider based in Atlanta, GA.

As a privately held company that was founded in 1994 ABOL has over 17 years of experience in the shipping industry. ABOL is also a technology partner to many large shippers, carriers, and parcel consolidators.

ABOL provides software solutions that simplify the process of shipping parcels for any size company. A seamless integration with existing systems make it easier and more cost effective than ever before to upgrade or install a shipping solution.

With ABOL's Multi-Carrier shipping system the amount of time that is spent on each package is dramatically reduced.

ABOL Software offers solutions for any size shipper.

- **iabol is an easy internet shipping solution** providing multi-carrier choices while enabling users to follow centrally managed shipping policies. Users can sign up for shipping services online. Features include the ability to add additional carriers on demand, generate and print shipping labels, import Outlook address book, track packages etc.

- **aibol API** is designed to work with the iabol.com web interface. The API allows for easy integration into existing systems and serves as an alternative to perform core shipping functions.

- **Virtual Manifesting** leverages data from your business management systems, ABOL shipping solutions and/or 3rd party manifest systems to process postal shipments for eVS.

- **Global Manifest Systems (AMX)** are powerful, high-volume, client-server, parcel processing and manifesting solutions with flexibility, scalability, and integration with existing business systems and processes.
