

## **OnTrac Shipping Process is Easy with ECS! – Start Shipping today from **SAP Landscape**.**

ProcessWeaver is pleased to offer the Global Enterprise Centralized Shipping (ECS) solution for SAP which fully integrates and supports all services from OnTrac. The ECS solution from ProcessWeaver, Inc. is an enterprise wide multi-carrier, native shipping/manifesting SAP footprint solution. This empowers SAP customers to perform the OnTrac compliant shipping process from within SAP landscape, hence eliminating redundant systems and business processes. ECS can find the best rates and services within the states of California, Arizona, Nevada, Oregon, Washington and Utah. Services that are supported include **Sunrise, Sunrise Gold, CalTrac, Heavyweight, Saturday delivery and Collect on Delivery (COD)**.

### **Key Benefit's of SAP Footprint OnTrac ECS Solution:**

- Improve efficiency by performing the OnTrac shipping process right from SAP Landscape.
- Print OnTrac Shipping labels and generate live manifests right from SAP Landscape.
- Save on labor costs by reducing the actual shipment processing time from minutes to seconds. No additional hardware or software has to be deployed or administered.
- Automate the e-mail notification of shipment and delivery information.
- Process shipments more efficiently - you no longer have to fill out a waybill
- ECS is the solution that will stay with you for as long as you continue to be using SAP.
- ECS Leverages the SAP repository - no more replication of master or transactional data.
- Increase Productivity and improve customer service.
- Eliminate redundant systems and business processes.
- Provides a single source of truth which is key to Business wide visibility.
- Built in Backup & Recovery processing.
